Certifications

LFS216: Linux Security Fundamentals
Agents & Agentic AI Fundamentals
LFS201: Linux Foundation

Publications

Encryption/Decryption - invoking OpenSSL API through JNI calls

Neelima Krishnan

Security Researcher | Intel PRTs | x86 CPU Security Side Channels
| Keep speculating | Offensive Security research in AI Accelerators |
Product Security Expert | Linux Kernel
Portland, Oregon, United States

Summary

Software Engineer who loves solving complex problems, obsessing over tiny details, and occasionally finding security bugs no one asked for. I am all about building smart, secure systems and learning something new every step of the way.

Fueled by coffee, driven by curiosity. Let's build cool things or at least fix the weird ones. Always up for a good brainstorm, especially around security or figuring out what agentic AI might teach us next!

Experience

Intel Corporation
10 years 5 months

Security Researcher(Tech Lead and Manager)
April 2024 - Present (1 year 4 months)
Portland, Oregon, United States

A security researcher specializing in developing PoCs to validate security mitigations on x86 CPUs. Leads a team responsible for scaling automation and driving research and development initiatives. Additionally, focuses on security R&D aimed at defining and ensuring the security of AI clusters

Systems Security Researcher
October 2022 - August 2024 (1 year 11 months)
Portland, Oregon, United States

Figuring out offensive security research and making progress breaking things. Still glaring at Ring 0 and below for kicks! X86 only.

OS Kernel Engineer
March 2015 - August 2024 (9 years 6 months)
Hillsboro, OR

BSidesPDX
Member Board of Directors

April 2023 - April 2025 (2 years 1 month)

Portland, Oregon Metropolitan Area

Intel Corporation

Intel Corporation SSG- Developer Relations Division- Android Security Engineer, Intern

April 2014 - December 2014 (9 months)

Hillsboro, OR

Performance Analysis on various Cryptography Providers and related encryption Algorithms, linked into the OpenSSL library in Android IA. Other research interests include- writing exploits targeting embedded devices to validate security objectives. I also love to build things that talk.

Millennium Consultants

Software Engineer- Android application developer

September 2013 - March 2014 (7 months)

New Jersey (Remote)

Main area of focus was on Android application development.

The Ted and Karen Hume Center for National Security and Technology

Graduate Research Assistant

August 2011 - May 2013 (1 year 10 months)

Blacksburg, Virginia

Major contribution was focused on restructuring the Android OS Stack- to enable virtualization, Intrusion Detection and Prevention Systems run natively in Android. I have also worked briefly on adding SELinux patch to Android kernel to provide per application security and thwart cross container contamination. My advisors : Dr. Joe Tront and Dr. Charles Clancy.

Virginia Tech

Graduate Teaching Assistant

January 2011 - May 2011 (5 months)

Assisted Dr. Manuel Perez-Quinones in his class- Internet Software Design.

Infosys

Software Developer

November 2007 - December 2008 (1 year 2 months)

Trained in C/C++, Java, Oracle SQL, PeopleSoft, SAP-ABAP-HR.

Education

Virginia Polytechnic Institute and State University

Master's degree, Computer Science · (2011 - 2012)

Kerala University, Thiruvananthapuram

Bachelor of Technology, Computer Science · (2003 - 2007)
